The Rehabilitation Research and Training Center on Disability Statistics and Demographics (StatsRRTC) is funded by the U.S. Department of Health and Human Services Administration For Community Living National Institute on Disability, Independent Living, and Rehabilitation Research (NIDILRR) - Rehabilitation Research and Training Centers (RRTCs) Program under grant number 90RT5022-02-01, from 2013 - 2018. The information developed by the StatsRRTC does not necessarily represent the policy of the Department of Health and Human Services, and you should not assume endorsement by the Federal Government.

The StatsRRTC is part of the Institute on Disability at the University of New Hampshire. The Institute on Disability/UCED (IOD) was established in 1987 to provide a university-based focus for the improvement of knowledge, policies, and practices related to the lives of people with disabilities and their families and is New Hampshire's University Center for Excellence in Disability (UCED). Located within the University of New Hampshire, the IOD is a federally designated center authorized by the Developmental Disabilities Act. Through innovative and interdisciplinary research, academic, service, and dissemination initiatives, the IOD builds local, state, and national capacities to respond to the needs of individuals with disabilities and their families.

Introduction

Overview. Statistics are a powerful tool—in research, policymaking, program evaluation, and advocacy. They are used to frame the issues, monitor current circumstances and progress, judge the effectiveness of policies and programs, make projections about the future, and predict the costs of potential policy changes.

In the United States, statistics about the population with disabilities and about the government programs that serve people with disabilities—disability statistics—are often difficult to find. Numerous government agencies generate and publish disability statistics, and as a result, disability statistics are scattered and buried in documents and websites all across the federal government.

The *Annual Disability Statistics Compendium* is a publication of statistics about people with disabilities and about the government programs which serve them. It is modeled after the *Statistical Abstracts of the United States*, published yearly by the U.S. Department of Commerce. The *Compendium* is designed to serve as a summary of government statistics.

New this year. The *2015 Annual Disability Statistics Compendium* underwent significant revisions this year. Over 100 tables have been added or expanded with additional age ranges—the *Compendium* now has tables representing the aging population whenever possible. The Health Insurance and Medicaid and Medicare sections from previous years were combined, and time trend data was added where available.

The introductory text of each section has been revised. This text now describes table sources and content, defining disability and employment for any given section. The text acknowledges the source information at the bottom of each table, where the source of data appearing in each table is presented. These sources contain additional statistical information about the ways the data were collected and the statistics were generated. Each year, the *Compendium* reflects the statistics published over the year, where available.

Glossary. The glossary has been expanded to assist in the interpretation of the statistics

contained in the *Compendium*. Words and phrases defined in the glossary are now in boldface text throughout the report.

Additional Resources. A companion *Annual Report* is available providing graphic representations of key findings and state differences. The *Annual Report* highlights state and trend data using maps related to specific tables in the *Compendium*. The statistics presented here, as well as those in the *Annual Report*, can be viewed and downloaded at www.disabilitycompendium.org. Help navigating the *Compendium* can be found at www.disabilitycompendium.org/help, as well as a Frequently Asked Questions section at www.disabilitycompendium.org/faq. Assistance in interpreting and locating additional statistics is available via our toll-free number, 866.538.9521, or by email, disability.statistics@unh.edu.

Section 1: Population and Prevalence

This section presents statistics on the United States **resident population, projected population, and people with disabilities**. The **prevalence** statistics describe disability frequency by age and **disability type**. The principal source of these data is the **U.S. Census Bureau**, specifically the **American Community Survey**. For these tables, statistics for people with disabilities (**disability status** or **disability type**) are based on having responded ‘yes’ to a series of questions within the **American Community Survey**, see the glossary for more details.

Tables

Table 1.1: In 2014, the **resident population** in the United States was estimated to be 318,857,056 individuals, up from 316,497,531 individuals in 2013—a 2.29 percent increase. The state with the largest **population** in 2014 was California, with 38,802,500 individuals. The state with the smallest **population** in 2014 was Wyoming, with 584,153 individuals. The largest percentage increase in **population** from 2011 to 2014 was in North Dakota—a 7.9 percent increase, while the largest decrease in **population** was in West Virginia—a 0.25 percent decrease.

Table 1.2: The projected 2030 **resident population** in the United States is 363,584,435 individuals—a projected 12.8 percent increase from 2015. The state with the largest projected **population** in 2030 is California, with 46,444,861 individuals. The largest projected percentage increase in **population** from 2015 to 2030 is in Arizona—a 42.9 percent increase, while the largest projected decrease in **population** was in the District of Columbia—a 14.4 percent decrease.

Table 1.3: Based on data from the **American Community Survey**, in 2014, there were 313,890,422 individuals **living in the community**, 39,674,679 of which were individuals with disabilities—12.6 percent. The state with the largest number of individuals with disabilities was California, with 4,050,631

individuals with disabilities, while the state with the smallest number of individuals with disabilities was Wyoming, with 71,225 individuals with disabilities.

Table 1.4: In 2014, there were 19,771,799 individuals under 5 years old **living in the community**, 153,635 of which were individuals with disabilities—0.8 percent. For this age range, Wyoming and Arkansas had the highest percentages, 1.9 percent, while Hawaii had the lowest percentage, 0.25 percent.

Table 1.5: In 2014, there were 53,668,474 individuals ages 5 to 17 years **living in the community**, 2,900,395 of which were individuals with disabilities—5.4 percent. For this age range, Puerto Rico had the highest percentage, 10.1 percent, while New Mexico had the lowest percentage, 4.1 percent.

Table 1.6: In 2014, there were 195,537,213 individuals ages 18 to 64 years **living in the community**, 20,460,136 of which were individuals with disabilities—10.5 percent. For this age range, Puerto Rico had the highest percentage, 18.1 percent, while New Jersey had the lowest percentage, 7.8 percent.

Table 1.7: In 2014, there were 44,912,936 individuals ages 65 years and over **living in the community**, 16,160,513 of which were individuals with disabilities—36.0 percent. For this age range, Puerto Rico had the highest percentage, 49.7 percent, while Delaware had the lowest percentage, 30.4 percent.

Tables 1.8-1.27:

In 2014, of the 19,771,799 individuals ages under 5 years living in the community,

- 104,918 individuals (or 0.5 percent) had a **hearing disability**, and
- 89,062 individuals (or 0.5 percent) had a **vision disability**.

In 2014, of the 53,668,474 individuals ages 5 to 17 years living in the community,

- 333,416 individuals (or 0.6 percent) had a **hearing disability**,

- 454,831 individuals (or 0.8 percent) had a **vision disability**,
- 2,215,470 individuals (or 4.1 percent) had a **cognitive disability**,
- 341,194 individuals (or 0.6 percent) had an **ambulatory disability**, and
- 512,377 individuals (or 1.0 percent) had a **self-care disability**.

In 2014, of the 195,537,213 individuals ages 18 to 64 years living in the community,

- 4,057,664 individuals (or 2.1 percent) had a **hearing disability**,
- 3,802,921 individuals (or 1.9 percent) had a **vision disability**,
- 8,669,210 individuals (or 4.4 percent) had a **cognitive disability**,
- 10,225,155 individuals (or 5.2 percent) had an **ambulatory disability**,
- 3,645,109 individuals (or 1.9 percent) had a **self-care disability**, and
- 7,224,420 individuals (or 3.7 percent) had an **independent living disability**.

In 2014, of the 44,912,936 individuals ages 65 years and over living in the community,

- 6,741,792 individuals (or 15 percent) had a **hearing disability**,
- 2,999,479 individuals (or 6.7 percent) had a **vision disability**,
- 4,100,310 individuals (or 9.1 percent) had a **cognitive disability**,
- 10,351,110 individuals (or 23.0 percent) had an **ambulatory disability**,
- 3,785,383 individuals (or 8.4 percent) had a **self-care disability**, and
- 6,849,013 individuals (or 15.2 percent) had an **independent living disability**.

Table 1.27: In 2013, there were 39,892,960 individuals with disabilities **living in the community**. In 2014, there were 39,674,679 individuals with disabilities **living in the**

community, a 0.5 percent decrease. The largest percent increase in the **population** of individuals with disabilities from 2013 to 2014 was in Rhode Island, 10.9 percent. South Dakota had the largest decrease in the **population** of individuals with disabilities from 2013 to 2014, a 6.4 percent decrease.

[1] Difference between the current and previous count divided by the previous count.

Section 2: Employment

This section presents statistics on monthly and annual **employment participation** and **full-time, year-round (FTYR) employment** in the United States. For both categories of **employment**, data are presented for people with disabilities, people without disabilities, and the difference in percentage **employed (employment gap)** between these two **populations**. There are three sources of data used in this section.

The first source of these data is the **American Community Survey (U.S. Census Bureau)**. For these tables, statistics for people with disabilities (**disability status** or **disability type**) are based on having responded ‘yes’ to a series of questions within the **American Community Survey**. The definition for **employment status** in the **American Community Survey** can be found in the glossary.

Monthly time trends are from the Bureau of Labor Statistics Data Retrieval System and are based on data from the **Current Population Survey-Basic Monthly Survey**. Annual time trends were produced by the authors using data from the **Current Population Survey-Annual Social and Economic Supplement**, which is fielded annually in March. For these tables, similar to the **American Community Survey**, statistics for people with disabilities (**disability status**) are based on having responded ‘yes’ to a series of questions within the **Current Population Survey**. In addition, the definition for **employment status** in both **Current Population Surveys** can be found in the glossary.

Tables

Tables 2.1 and 2.2: In 2014, of the 20,460,136 individuals with disabilities ages 18 to 64 years **living in the community**, 7,030,317 individuals were **employed**—34.4 percent. In contrast, of the 175,077,077 individuals without disabilities ages 18 to 64 years **living in the community**, 131,940,323 individuals were **employed**—75.4 percent. The percentage of people with disabilities **employed** was highest in South

Dakota (50.1 percent) and lowest in Puerto Rico (22.3 percent).

Table 2.3: In 2014, of the 4,057,664 individuals with **hearing** disabilities ages 18 to 64 years **living in the community**, 2,056,658 individuals were **employed**—50.7 percent. The percentage of people with **hearing** disabilities **employed** was highest in Wyoming (67.9 percent) and lowest in Puerto Rico (27.2 percent).

Table 2.4: In 2014, of the 3,802,921 individuals with **vision** disabilities ages 18 to 64 years **living in the community**, 1,529,152 individuals were **employed**—40.2 percent. The percentage of people with **vision** disabilities **employed** was highest in Iowa (56.4 percent) and lowest in West Virginia (26.2 percent).

Table 2.5: In 2014, of the 8,669,210 individuals with **cognitive** disabilities ages 18 to 64 years **living in the community**, 2,097,518 individuals were **employed**— 24.2 percent. The percentage of people with **cognitive** disabilities **employed** was highest in North Dakota (42.6 percent) and lowest in Puerto Rico (13.9 percent).

Table 2.6: In 2014, of the 10,225,155 individuals with **ambulatory** disabilities ages 18 to 64 years **living in the community**, 2,476,989 individuals were **employed**—24.2 percent. The percentage of people with **ambulatory** disabilities **employed** was highest in Nebraska (34.8 percent) and lowest in Kentucky (17.9 percent).

Table 2.7: In 2014, of the 3,645,109 individuals with **self-care** disabilities ages 18 to 64 years **living in the community**, 561,598 individuals were **employed**—15.4 percent. The percentage of people with **ambulatory** disabilities **employed** was highest in Wyoming (28.1 percent) and lowest in Mississippi (9.7 percent).

Table 2.8: In 2014, of the 7,224,420 individuals with **independent living** disabilities ages 18 to 64 years **living in the community**, 1,146,316 individuals were **employed**—15.9 percent. The percentage of people with **independent living** disabilities **employed** was highest in South Dakota (32.8 percent) and lowest in Puerto Rico (8.8 percent).

Table 2.9: In 2014, 34.4 percent of people with disabilities ages 18 to 64 years **living in the community** were **employed**, while 75.4 percent of people without disabilities ages 18 to 64 years **living in the community** were **employed**—a difference of 41.0 **percentage points**. The difference was greatest in Maine (47.4 **percentage points**) and smallest in Puerto Rico (30.1 **percentage points**).

Table 2.10: In 2014, the difference in the percentage of people **employed** with and without disabilities ages 18 to 64 years **living in the community** was 41.0 **percentage points**, while the comparable measure was 40.3 **percentage points** in 2013, an increase of 0.7 percent.

Tables 2.11 and 2.12: In 2013, of the 21,632,455 individuals with disabilities ages 16 to 64 years **living in the community**, 4,308,543 individuals were **employed full time, year-round**—19.9 percent. In contrast, of the 184,539,554 individuals without disabilities ages 16 to 64 years **living in the community**, 93,484,780 individuals were **employed full-time, year-round**—50.7 percent. The percentage of people with disabilities **employed full-time, year-round** was highest in North Dakota (34.8 percent) and lowest in Puerto Rico (13.3 percent).

Table 2.13: In 2013, 19.9 percent of people with disabilities ages 16 to 64 years **living in the community** were **employed full-time, year-round**, while 50.7 percent of people without disabilities ages 16 to 64 years **living in the community** were **employed full-time, year-round**—a difference of 30.7 **percentage points**. The difference in the percentage of **full-time, year-round employment** was greatest in District of Columbia (37.5 **percentage points**) and smallest in Puerto Rico (21.0 **percentage points**).

Table 2.14: In August 2015, of the 15,842,000 **non-institutionalized civilians** ages 16 to 64 years with disabilities, 4,267,000 were **employed**, an **employment-to-population ratio** of 26.9 percent. The **employment-to-population ratio**

has slightly increased since June 2011, and is still higher than its lowest value of 24.1 percent in January 2014. By comparison, in August 2015, of the 188,612,000 **non-institutionalized civilians** without disabilities, 136,550 were employed, for an **employment-to-population ratio** of 72.4 percent.

Table 2.15: In August 2015, of the 14,016,000 **non-institutionalized civilians** ages 65 years and over with disabilities, 969,000 were **employed**, an **employment-to-population ratio** of 6.9 percent. The **employment-to-population ratio** has slightly increased since June 2011, is higher than its lowest value of 6.1 percent in November 2013. By comparison, in August 2015, of the 32,626,000 **non-institutionalized civilians** without disabilities, 7,440,000 were employed, for an **employment-to-population ratio** of 22.8 percent.

Table 2.16: In August 2015, of the 15,842,000 **non-institutionalized civilians** ages 16 to 64 years with disabilities, 4,808,000 **participated in the labor force** (by either, working or looking for work), a **labor force participation rate** of 30.3 percent. This **labor force participation rate** has declined from 32.8 in June 2011. In comparison, in August 2015, of the 188,612,000 **non-institutionalized civilians** without disabilities, 143,829,000 participated in the **labor force**, for a **labor force participation rate** of 76.3 percent.

Table 2.17: In August 2015, of the 14,016,000 **non-institutionalized civilians** ages 65 years and over with disabilities, 1,024,000 **participated in the labor force** (by either, working or looking for work), a **labor force participation rate** of 7.3 percent. This **labor force participation rate** has increased 7.1 in June 2011. By comparison, in August 2015, of the 32,626,000 **non-institutionalized civilians** without disabilities, 7,727,000 **participated in the labor force**, for a **labor force participation rate** of 23.7 percent.

Table 2.18: In August 2015, of the 4,808,000 **non-institutionalized civilians** ages 16 to 64 with disabilities **participating in the labor**

force, 541,000 were not working but actively looking for work, an **unemployment rate** of 11.3 percent. This is lower than the **unemployment rate** in June 2011 (18.6 percent), but higher than the lowest **unemployment rate** in June 2015 (10.1 percent). By comparison, in August 2015, of the 143,829,000 **non-institutionalized civilians** without disabilities **participating in the labor force**, 7,279,000 were not working but actively looking for work, an **unemployment rate** of 5.1 percent.

Table 2.19: In August 2015, of the 1,024,000 **non-institutionalized civilians** ages 65 and older with disabilities **participating in the labor force**, 55,000 were not working but actively looking for work, an **unemployment rate** of 5.4 percent. This is lower than the **unemployment rate** in June 2011 (7.8 percent), but higher than the lowest **unemployment rate** in May 2015 (4.1 percent). By comparison, in August 2015, of the 7,727,000 **non-institutionalized civilians** without disabilities **participating in the labor force**, 287,000 were not working but actively looking for work, an **unemployment rate** of 3.7 percent.

Table 2.20: In 2015, of the 204,086,000 **non-institutionalized civilians** ages 16 to 64 years, 8.9 percent (18,135,000) had a **work limitation**, 7.7 percent (15,747,000) had a broad disability and 12.2 percent (24,938,000) had a **work limitation** and/or a broad disability.

Table 2.21: In 2015, of the 91,988,000 **non-institutionalized civilians** ages 65 years and over, 15.0 percent (13,819,000) had a **work limitation**, 29.8 percent (27,377,000) had a broad disability and 35.5 percent (32,642,000) had a **work limitation** and/or a broad disability.

Table 2.22: In 2015, the **labor force participation rate** among **non-institutionalized civilians** ages 16 to 64 years was 22.7 percent for people with a **work limitation** and 77.1 percent for people without a **work limitation**. The **labor force participation rate** was 30.6 percent for people with a broad disability as compared to 75.7 percent for people without a broad disability. The **labor force participation rate** was

32.3 percent for people with a **work limitation** and/or broad disability as compared to 77.8 percent for people without a **work limitation** and/or broad disability.

Table 2.23: In 2015, the **labor force participation rate** among **non-institutionalized civilians** ages 65 years and over was 6.8 percent for people with a **work limitation** and 21.9 percent for people without a **work limitation**. The **labor force participation rate** was 7.1 percent for people with a broad disability as compared to 25.0 percent for people without a broad disability. The **labor force participation rate** was 7.9 percent for people with a **work limitation** and/or broad disability as compared to 26.1 percent for people without a **work limitation** and/or broad disability.

Table 2.24: In 2015, the **employment rate** among **non-institutionalized civilians** ages 16 to 64 years was 19.7 percent for people with a **work limitation** and 72.8 percent for people without a **work limitation**. The **employment rate** was 26.9 percent for people with a broad disability as compared to 71.5 percent for people without a broad disability. The **employment rate** was 28.5 percent for people with a **work limitation** and/or broad disability as compared to 73.6 percent for people without a **work limitation** and/or broad disability.

Table 2.25: In 2015, the **employment rate** among **non-institutionalized civilians** ages 65 years and over was 6.4 percent for people with a **work limitation** and 21.2 percent for people without a **work limitation**. The **employment rate** was 6.6 percent for people with a broad disability as compared to 24.2 percent for people without a broad disability. The **employment rate** was 7.5 percent for people with a **work limitation** and/or broad disability as compared to 25.3 percent for people without a **work limitation** and/or broad disability.

Table 2.26: In 2015, the **labor market attachment rate** among **non-institutionalized civilians** ages 16 to 64 years was 25.2 percent for people with a **work limitation** and 76.9 percent for people without a **work limitation**.

The **labor market attachment rate** was 32.8 percent for people with a broad disability as compared to 75.6 percent for people without a broad disability. The **labor market attachment rate** was 34.6 percent for people with a **work limitation** and/or broad disability as compared to 77.5 percent for people without a **work limitation** and/or broad disability.

Table 2.27: In 2015, the **labor market attachment rate** among **non-institutionalized civilians** ages 65 years and over was 8.0 percent for people with a **work limitation** and 24.3 percent for people without a **work limitation**. The **labor market attachment rate** was 8.2 percent for people with a broad disability as compared to 27.6 percent for people without a broad disability. The **labor market attachment rate** was 9.2 percent for people with a **work limitation** and/or broad disability as compared to 28.8 percent for people without a **work limitation** and/or broad disability.

Table 2.28: In 2015, the **full-time, full-year rate** among **non-institutionalized civilians** ages 16 to 64 years was 8.6 percent for people with a **work limitation** and 54.4 percent for people without a **work limitation**. The **full-time, full-year rate** was 17.6 percent for people with a broad disability as compared to 53.1 percent for people without a broad disability. The **full-time, full-year rate** was 16.6 percent for people with a **work limitation** and/or broad disability as compared to 55.0 percent for people without a **work limitation** and/or broad disability.

Table 2.29: In 2015, the **full-time, full-year rate** among **non-institutionalized civilians** ages 65 years and over was 1.8 percent for people with a **work limitation** and 13.0 percent for people without a **work limitation**. The **full-time, full-year rate** was 3.3 percent for people with a broad disability as compared to 14.8 percent for people without a broad disability. The **full-time, full-year rate** was 3.3 percent for people with a **work limitation** and/or broad disability as compared to 15.8 percent for people without a **work limitation** and/or broad disability.

Source: Calculations based on U.S. Bureau of Labor Statistics, Current Population Survey, Basic Monthly Survey, www.bls.gov/webapps/legacy/cpsatab6.htm; (Accessed 10 November 2015). Also see the Office of Disability and Employment Policy, www.dol.gov/dol/topic/disability/index.htm. Statistics are not seasonally adjusted. Data represents the civilian, noninstitutional population.

[1] In thousands (15,308 represents 15,308,000), except as indicated.

[2] Employed as a percent of the group total. The Bureau of Labor Statistics calls this statistic the Employment-Population Ratio. Others call it the Employment Rate.

[3] Percent of people employed without disabilities divided by the percent of people with disabilities who are employed.

Section 3: Poverty

This section presents statistics on **poverty** in the United States. The statistics describe the number and percentage of people with and without disabilities who experience **poverty** as well as the difference between the **poverty rates (poverty gap)** of people with and without disabilities. The principal source of these data is the **U.S. Census Bureau**, specifically the **American Community Survey**. For these tables, statistics for people with disabilities (**disability status**) are based on having responded ‘yes’ to a series of questions within the **American Community Survey** (see the glossary for more details). Annual time trends were produced by the authors using data from the **Current Population Survey-Annual Social and Economic Supplement**, which is fielded annually in March. Similar to the **American Community Survey**, statistics for people with disabilities (**disability status**) are based on having responded ‘yes’ to a series of questions within the **Current Population Survey**. **Poverty** is defined by the U.S. Office of Management and Budget and set as a dollar threshold by the **U.S. Census Bureau** in all sources (see glossary for details).

Tables

Tables 3.1 and 3.5: In 2014, of the 148,541 individuals with disabilities ages under 5 years who were **living in the community**, 50,456 individuals lived in **poverty**—a **poverty rate** of 34.0 percent. In contrast, of the 19,304,614 individuals without disabilities ages under 5 years **living in the community**, 4,607,731 individuals lived in **poverty**—a **poverty rate** of 23.9 percent. The **poverty rate** for people with disabilities was highest in Kentucky (66.8 percent) and lowest in New Jersey (9.0 percent).

Tables 3.2 and 3.6: In 2014, of the 2,837,660 individuals with disabilities ages 5 to 17 years who were **living in the community**, 924,033 individuals lived in **poverty**—a **poverty rate** of 32.6 percent. In contrast, of the 50,095,670 individuals without disabilities ages 5 to 17 years **living in the community**, 10,103,792 individuals lived in **poverty**—a **poverty rate** of 20.2 percent. The **poverty rate** for people with disabilities was

highest in Puerto Rico (63.6 percent) and lowest in North Dakota (17.7 percent).

Tables 3.3 and 3.7: In 2014, of the 20,349,020 individuals with disabilities ages 18 to 64 years who were **living in the community**, 5,744,797 individuals lived in **poverty**—a **poverty rate** of 28.2 percent. In contrast, of the 172,583,524 individuals without disabilities ages 18 to 64 years **living in the community**, 22,508,075 individuals lived in **poverty**—a **poverty rate** of 13.0 percent. The **poverty rate** for people with disabilities was highest in Puerto Rico (53.1 percent) and lowest in Alaska (19.2 percent).

Tables 3.4 and 3.8: In 2014, of the 16,160,513 individuals with disabilities ages 65 years and over who were **living in the community**, 2,093,101 individuals lived in **poverty**—a **poverty rate** of 13.0 percent. In contrast, of the 28,752,287 individuals without disabilities ages 65 years **living in the community**, 2,161,792 individuals lived in **poverty**—a **poverty rate** of 7.5 percent. The **poverty rate** for people with disabilities was highest in Puerto Rico (44.4 percent) and lowest in Alaska (5.9 percent).

Table 3.9: In 2014, the **poverty rate** of individuals with disabilities ages under 5 years **living in the community** was 34.0 percent, while the **poverty rate** of individuals without disabilities ages under 5 years **living in the community** was 23.9 percent—a difference of 10.1 percentage points. The **poverty gap** was smallest in North Dakota (a difference of 16.8 **percentage points**) and greatest in District of Columbia (a difference of 76.0 **percentage points**).

Table 3.10: In 2014, the **poverty rate** of individuals with disabilities ages 5 to 17 years **living in the community** was 32.6 percent, while the **poverty rate** of individuals without disabilities ages 5 to 17 years **living in the community** was 20.2 percent—a difference of 12.4 percentage points. The **poverty gap** was smallest in Alaska (a difference of 2.8 **percentage points**) and greatest in District of Columbia (a difference of 37.0 **percentage points**).

Table 3.11: In 2014, the **poverty rate** of individuals with disabilities ages 18 to 64 years **living in the community** was 28.2 percent, while the **poverty rate** of individuals without disabilities ages 18 to 64 years **living in the community** was 13.0 percent—a difference of 15.2 **percentage points**. The **poverty gap** was smallest in Alaska (a difference of 9.5 **percentage points**) and greatest in District of Columbia (a difference of 27.1 **percentage points**).

Table 3.12: In 2014, the **poverty rate** of individuals with disabilities ages 65 years and over **living in the community** was 13.0 percent, while the **poverty rate** of individuals without disabilities ages 65 years and over **living in the community** was 7.5 percent—a difference of 5.4 **percentage points**. The **poverty gap** was smallest in Delaware (a difference of 1.4 **percentage points**) and greatest in District of Columbia (a difference of 12.9 **percentage points**).

Table 3.13: In 2013, the **poverty gap** between individuals with and without disabilities ages under 5 years **living in the community** was 11.3 percent. In 2014, the **poverty gap** between individuals with and without disabilities ages under 5 years **living in the community** was 10.1 percent, a 1.2 **percentage point** decrease. The largest **percentage point** increase in the **poverty gap** from 2013 to 2014 was in Kentucky, a 35.8 **percentage point** increase, while the largest decrease in the **poverty gap** was in South Carolina, a 45.1 **percentage point** decrease.

Table 3.14: In 2013, the **poverty gap** between individuals with and without disabilities ages 5 to 17 years **living in the community** was 13.5 percent. In 2014, the **poverty gap** between individuals with and without disabilities ages 5 to 17 years **living in the community** was 12.4 percent, a 1.1 **percentage point** decrease. The largest **percentage point** increase in the **poverty gap** from 2013 to 2014 was in District of Columbia, a 20.1 **percentage point** increase, while the largest decrease in the **poverty gap** was in South Dakota, a 17.7 **percentage point** decrease.

Table 3.15: In 2013, the **poverty gap** between individuals with and without disabilities ages 18 to 64 years **living in the community** was 15.1 percent. In 2014, the **poverty gap** between individuals with and without disabilities ages 18 to 64 years **living in the community** was 15.2 percent, a 0.1 **percentage point** increase. The largest **percentage point** increase in the **poverty gap** from 2013 to 2014 was in District of Columbia, a 5.3 **percentage point** increase, while the largest decrease in the **poverty gap** was in Idaho, a 3.1 **percentage point** decrease.

Table 3.16: In 2013, the **poverty gap** between individuals with and without disabilities ages 65 years and over **living in the community** was 5.8 percent. In 2014, the **poverty gap** between individuals with and without disabilities ages 65 years and over **living in the community** was 5.4 percent, a 0.4 **percentage point** decrease. The largest **percentage point** increase in the **poverty gap** from 2013 to 2014 was in Rhode Island, a 4.6 **percentage point** increase, while the largest decrease in the **poverty gap** was in Hawaii, a 2.7 **percentage point** decrease.

Table 3.17: In 2015, the **poverty rate** among **non-institutionalized civilians** ages 16 to 64 was 30.5 percent for people with a **work limitation** and 12.0 percent for people without a **work limitation**. The **poverty rate** was 28.5 percent for people with a broad disability as compared to 12.4 percent for people without a broad disability. The **poverty rate** was 27.6 percent for people with a **work limitation** and/or broad disability as compared to 11.7 percent for people without a **work limitation** and/or broad disability.

Source: Authors' calculations using the Current Population Survey-Annual Social and Economic Supplement.

[1] The percentage of people in poverty with or without work limitations or broad disabilities.

[2] Work Limitation and/or broad disability definition.

Section 4: Earnings

This section presents statistics on **earnings** in the United States. The statistics describe the **earnings** of individuals with and without disabilities in the past 12 months, as well as the difference in percentage **earned (earnings gap)** between these two **populations**. The principal source of these data is the **U.S. Census Bureau**, specifically the **American Community Survey**. Statistics for people with disabilities (**disability status**) are based on having responded ‘yes’ to a series of questions within the **American Community Survey** (see the glossary for more details.) In addition, in the **American Community Survey** people are asked about their total **income** for the past 12 months. This information is used to calculate **earnings**. When presenting **earnings** data, the **median earnings** (or middlemost) value is used rather than the average **earnings** because people’s **incomes** are heavily skewed—the higher the salary, the fewer people who earn that respective salary—the average does not represent the **population** as well as the median.

Tables

Tables 4.1: In 2014, for the individuals with disabilities ages 16 years and over **living in the community** that had **earnings** from work, **median earnings** were \$21,232. In contrast, among individuals without disabilities ages 16 years and over **living in the community** that had earnings from work, **median earnings** were \$31,324, an **earnings gap** of \$10,092. This **earnings gap** is smallest (meaning the **earnings** of people with disabilities are closest to the **earnings** of people without disabilities) in Puerto Rico (\$2,304) and largest (meaning the **earnings** of people with disabilities are furthest from the **earnings** of people without disabilities) in District of Columbia \$21,603.

[1] The difference in median earnings of no disability and disability.

Section 5: Veterans

This section presents statistics on **Veterans** in the United States. Specifically, the data address **service connected to disability rating**; the prevalence of disabilities in the **Veteran population**; the portion of the **Veteran population** that experiences **poverty** (as well as the difference between the **poverty rates (poverty gap)** of **Veterans** with and without disabilities), by **disability status**; and **Veterans' benefits**, by **disability status**. The principal sources of these data are the **U.S. Census Bureau**, specifically the **American Community Survey** and the **Veterans Benefits Administration's Annual Benefits Report**. For these tables, statistics for people with disabilities (**disability status**) are based on having responded 'yes' to a series of questions within the **American Community Survey** (see the glossary for more details.) **Poverty** is defined by the U.S. Office of Management and Budget and set as a dollar threshold by the **U.S. Census Bureau** in all sources (see the glossary for details).

Tables

Table 5.1: In 2014, according to the **American Community Survey**, 1,062,730 individuals ages 18 and over **living in the community** reported having a military **service-connected disability rating** of 70 percent or more.

Table 5.2: In 2014, there were 9,750,976 **civilian veterans** ages 18 to 64 years **living in the community**, 1,170,385 of which were individuals with disabilities—a **prevalence rate** of 12.0 percent. Puerto Rico had the highest **prevalence rate**, 29.1 percent, while Maryland had the lowest **prevalence rate**, 11.8 percent.

Table 5.3: In 2014, there were 9,155,353 **civilian veterans** ages 65 years and over **living in the community**, 3,650,723 of which were individuals with disabilities—a **prevalence rate** of 39.9 percent. Puerto Rico had the highest **prevalence rate**, 52.1 percent, while Delaware had the lowest **prevalence rate**, 33.6 percent.

Tables 5.4 and 5.6: In 2014, of the 1,770,385 **civilian veterans** with disabilities ages 18 to 64 years **living in the community**, 318,637 individuals lived in **poverty**—a **poverty rate**

of 18.0 percent. In contrast, of the 7,953,723 **civilian veterans** without disabilities ages 18 to 64 years **living in the community**, 578,038 **civilian veterans** lived in **poverty**—a **poverty rate** of 7.3 percent. The poverty rate for **civilian veterans** with disabilities was highest in District of Columbia (40.0 percent) and lowest in Alaska (7.8 percent).

Tables 5.5 and 5.7: In 2014, of the 3,650,712 **civilian veterans** with disabilities ages 65 years and over **living in the community**, 228,155 individuals lived in **poverty**—a **poverty rate** of 6.2 percent. In contrast, of the 5,504,630 **civilian veterans** without disabilities ages 65 years and over **living in the community**, 241,376 **civilian veterans** lived in **poverty**—a **poverty rate** of 4.4 percent. The **poverty rate** for **civilian veterans** with disabilities was highest in Puerto Rico (22.0 percent) and lowest in Alaska (2.7 percent).

Table 5.8: In 2014, the **poverty rate** of **civilian veterans** with disabilities ages 18 to 64 years **living in the community** was 18.0 percent, while the **poverty rate** of individuals without disabilities ages 18 to 64 years **living in the community** was 7.3 percent—a **poverty gap** of 10.7 **percentage points**. The **poverty gap** was smallest in Puerto Rico (1.7 **percentage points**, meaning the **poverty rate** of individuals without disabilities was higher than that of individuals with disabilities) and greatest in District of Columbia (30.6 **percentage points**).

Table 5.9: In 2014, the **poverty rate** of **civilian veterans** with disabilities ages 65 years and over **living in the community** was 6.2 percent, while the **poverty rate** of individuals without disabilities ages 65 years and over **living in the community** was 4.4 percent—a **poverty gap** of 1.9 **percentage points**. The **poverty gap** was smallest in Montana (-0.2 **percentage points**, meaning the **poverty rate** of individuals without disabilities was higher than that of individuals with disabilities) and greatest in District of Columbia (10.8 **percentage points**).

Table 5.10: In the **Federal Fiscal Year 2014**, the United States spent a total of \$75,265,436 on compensation and pension benefits paid to disabled **veterans**.

Section 6: Health Insurance Coverage

This section presents statistics on **health insurance coverage** in the United States, especially the **health insurance coverage** of people with disabilities. It presents statistics concerning **Medicaid** and **Medicare**, the government-run health care programs in the United States. Specifically, the data address the percentage of people with and without disabilities who have some sort of **health insurance coverage** as well as the difference in percent **health insurance coverage** between people with and without disabilities (**health insurance coverage gap**). The data also address the number of people with disabilities served under **Medicaid** and **Medicare** and the amount spent under each program on people with disabilities.

This section also presents the type of **health insurance coverage** possessed by people with disabilities. The principal source of these data is the **U.S. Census Bureau**, specifically the **American Community Survey**. Statistics for people with disabilities (**disability status**) are based on having responded ‘yes’ to a series of questions within the **American Community Survey** (see the glossary for more details.) People receiving disability benefits from Social Security usually automatically qualify for **Medicaid** and **Medicare**, however some states have more restrictive eligibility criteria. The principal source of the **Medicaid** and **Medicare** data is the **U.S. Department of Health and Human Services’ 2013 Medicare and Medicaid Statistical Supplement**, produced by the **Centers for Medicare and Medicaid Services**.

Tables

Table 6.1: In 2014, 96.0 percent of individuals with disabilities ages under 18 years **living in the community** had **health insurance coverage**. In contrast, 93.9 percent of individuals without disabilities ages under 18 years **living in the community** had **health insurance coverage**—a **health insurance coverage gap** between those with and without disabilities of 2.1 **percentage points**. In other

words, as a whole, 2.1 percent more individuals with disabilities had health insurance than individuals without disabilities. The **health insurance gap** ranges from 6.3 **percentage points** in Montana to -5.3 **percentage points** in Wyoming.

Table 6.2: In 2014, 86.7 percent of individuals with disabilities ages 18 to 64 years **living in the community** had **health insurance coverage**. In contrast, 83.4 percent of individuals without disabilities ages 18 to 64 years **living in the community** had **health insurance coverage**—a **health insurance coverage gap** between those with and without disabilities of 3.4 **percentage points**. In other words, as a whole, 3.4 percent more individuals with disabilities had health insurance than individuals without disabilities. The **health insurance gap** ranges from 8.3 **percentage points** in New Mexico to -3.1 **percentage points** in Wyoming.

Table 6.3: In 2014, 99.3 percent of individuals with disabilities ages 65 years and over **living in the community** had **health insurance coverage**. In contrast, 98.9 percent of individuals without disabilities ages 65 and over years **living in the community** had **health insurance coverage**—a **health insurance coverage gap** between those with and without disabilities of 0.4 **percentage points**. In other words, as a whole, 0.4 percent more individuals with disabilities had health insurance than individuals without disabilities. The **health insurance gap** ranges from 2.1 **percentage points** in Alaska to -0.4 **percentage points** in Kansas.

Table 6.4: In 2014, 42.3 percent of individuals with disabilities ages under 18 years **living in the community** had private **health insurance** and 62.6 percent had public **health insurance** (some had both), while 4.0 percent of individuals with disabilities ages under 18 years living in the community did not have **health insurance**. The state with the smallest percentage of people with disabilities without **health insurance coverage** was Rhode Island (0.4 percent). The state with the largest percentage of people with disabilities without

health insurance coverage was Wyoming (11.0 percent).

Table 6.5: In 2014, 44.2 percent of individuals with disabilities ages 18 to 64 years **living in the community** had private health insurance and 53.7 percent had public health insurance (some had both), while 13.3 percent of individuals with disabilities ages 18 to 64 years **living in the community** did not have health insurance. The state with the smallest percentage of people with disabilities without **health insurance coverage** was Massachusetts (3.3 percent). The state with the largest percentage of people with disabilities without **health insurance coverage** was Alaska (21.4 percent).

Table 6.6: In 2014, 57.1 percent of individuals with disabilities ages 65 years and over **living in the community** had private health insurance and 98.1 percent had public health insurance (some had both), while 0.7 percent of individuals with disabilities ages 65 years and over **living in the community** did not have health insurance. The state with the smallest percentage of people with disabilities without **health insurance coverage** was West Virginia (0.05 percent). The state with the largest percentage of people with disabilities without **health insurance coverage** was Texas (1.61 percent).

Table 6.7: In the **Federal Fiscal Year 2011**, the U.S. spent a total of 155,784 on **Medicaid** payments to people with disabilities, 42.7 percent of the total amount spent on all **Medicaid** payments. District of Columbia spent the largest percentage of its **Medicaid** payments on payments to people with disabilities (53.3 percent), while Arizona spent the smallest percentage of its **Medicaid** payments on payments to people with disabilities (26.9 percent).

Table 6.8: In the **Federal Fiscal Year 2011**, the U.S. **Medicaid** program served a total of 9,791,456 beneficiaries with disabilities, 14.3 percent of the total number of persons served by **Medicaid**. West Virginia had the largest percentage of **Medicaid** beneficiaries

with disabilities (26.0 percent), while Arizona had the smallest percentage of **Medicaid** beneficiaries with disabilities (7.2 percent).

Table 6.9: In the **Federal Fiscal Year 2012**, the U.S. **Medicare** program spent a total of 345,423,000 on people with disabilities, 19.8 percent of total **Medicare** expenditures. This was the largest percentage of **Medicare** spending on people with disabilities during any year between 1974 and 2012.

Table 6.10: As of July 1, 2012, the U.S. **Medicare** program served a total of 8,426,675 beneficiaries with disabilities, 17.0 percent of the total number of persons served by **Medicare**. Kentucky had the largest percentage of **Medicare** beneficiaries with disabilities (25.5 percent), while Hawaii had the smallest percentage of **Medicare** beneficiaries with disabilities (10.9 percent).

Table 6.11: From the **Federal Fiscal Year 2010** to **Federal Fiscal Year 2011**, the percentage of total beneficiaries of **Medicaid** with disabilities (i.e., the total number of disabled **Medicaid** beneficiaries divided by the total number of **Medicaid** beneficiaries) did not change in the U.S. The percentage of **Medicaid** beneficiaries with disabilities decreased the most in Kentucky (by 2.6 **percentage points**) and increased the most in Massachusetts (by 8.1 **percentage points**).

Table 6.12: From 2011 to 2012, the percentage of total **Medicare** enrollees with disabilities (i.e., the total number of disabled **Medicare** enrollees divided by the total number of **Medicare** enrollees) in the U.S. decreased by 0.1 **percentage points**. The percentage of **Medicare** enrollees with disabilities increased the most in District of Columbia (0.4 percent) and decreased the most in Alaska (a 0.7 percentage point increase).

[1] The percentage of total Medicare enrollees with disabilities (i.e., the total number of disabled Medicare enrollees divided by the total number of Medicare enrollees).

[2] The difference in the percent of people with disabilities enrolled in Medicare between 2010 and 2011

Section 7: Health

This section presents statistics on health in the United States, especially the health of people with disabilities. Specifically, the data address the prevalence of disabilities, health behaviors such as **smoking, binge drinking, obesity, and health insurance coverage by disability status**, and insurance. These statistics were generated by the authors using the **Behavioral Risk Factor Surveillance Survey**. See the Centers for Disease Control and Prevention's Disability and Health Data System for more detailed information on the health of the **population** with disabilities. Statistics for people with disabilities (**disability status**) are based on having responded 'yes' to two questions within the **Behavioral Risk Factor Surveillance Survey** (see the glossary for more details.)

Tables

Tables 7.1: In 2014, there were 233,595,726 individuals ages 18 and over **living in the community**, and 53,735,136 had a **disability** (23.0 percent). The state with the largest number of individuals with disabilities was California, with 5,916,378 individuals with disabilities, while the state with the smallest number of individuals with disabilities was Wyoming, with 95,078 individuals with disabilities. West Virginia had the highest prevalence rate, 31.7 percent, while the Hawaii had the lowest prevalence rate, 17.1 percent.

Table 7.2: In 2014, individuals (ages 18 years and over) with disabilities were more likely to **smoke** (24.5 percent) than adults without disabilities (15.3 percent). This finding was observed in all states. Adults with disabilities were most likely to **smoke** in Kentucky (36.1 percent) and least likely to **smoke** in Utah (14.5 percent).

Table 7.3: In 2014, individuals (ages 18 years and over) with disabilities were more likely to be **obese** (41.1 percent) than adults without disabilities (25.2 percent). This finding was observed in all states. Adults with disabilities were most likely to be **obese** in Delaware (46.3

percent) and least likely to be **obese** in Hawaii (31.1 percent).

Table 7.4: In 2014, individuals (ages 18 years and over) with disabilities were less likely to **binge drink** (11.0 percent) than adults without disabilities (17.5 percent). This finding was observed in all states. Adults with disabilities were most likely to **binge drink** in District of Columbia (17.8 percent) and least likely to **binge drink** in West Virginia (6.6 percent).

Table 7.5: In 2014, individuals ages 18 and over with disabilities in Massachusetts were most likely to have **health insurance coverage** (95.9 percent), while individuals ages 18 and over with disabilities in Georgia were least likely to have **health insurance coverage** (81.5 percent).

[1] The percentage of people with health insurance coverage with or without a disability.

[2] The difference in percentage points between people with health insurance coverage with and without a disability.

Section 8: Social Security Administration Programs

This section presents statistics on **Social Security Administration** Programs in the United States. Specifically, these data concern the number of **beneficiaries** served by, and the amount spent on, **Social Security Income** and **Social Security Disability Insurance**, by **disability status**. A table also addresses those who have concurrent benefits (are enrolled in both programs), by disability status. The principal source of this data is the **Social Security Administration**, specifically the 2013 Annual Statistical Supplement. The 2013 Annual Statistical Supplement provides information about programs administered by the **Social Security Administration**. In part, data in the Supplement provide a basis for research and policy recommendations for the programs.

In this section, **disability status** under Social Security is based on the ability to work. A person is considered disabled if they cannot do the work they did before; cannot adjust to other work because of a medical condition; and disability has lasted or is expected to last for at least one year or result in death. Definitions for aged (65 and older), blindness (statutory blindness), disabled adult child(ren), disabled widow(er) are specific to the **Social Security Administration** and Social Security Act and can be found on the **Social Security Administration** website.

Tables

Table 8.1: In December 2014, of the 8,334,660 individuals who received federally administered payments from the **Supplemental Security Income** program, 1,151,795 were eligible based on being 65 years or older, 67,376 were eligible based on blindness, and 7,115,489 were eligible based on **disability status**.

Table 8.2: In December 2014, of the 54,685,392 of federally administered payments from the **Supplemental Security Income** program, 5,687,315 was spent on individuals eligible based on being ages 65 years or older, 439,817 was spent on individuals eligible based on

blindness, and 48,558,260 was spent on individuals eligible based on **disability status**.

Table 8.3: In December 2014, of the 1,299,454 individuals under age 18 who received federally administered payments from the **Supplemental Security Income** program, 5,860 were eligible based on blindness, and 1,291,304 were eligible based on **disability status**.

Table 8.4: In December 2014, 805,536 individuals received federally administered payments from **Supplemental Security Income** program, and 157,272 of those who received payments were under age 18, 538,222 were ages 18 to 64, and 110,042 were ages 65 and older.

Table 8.5a: In December 2014, of the 10,031,039 individuals who were beneficiaries under the **Social Security Disability Insurance** program, 8,759,035 were **disabled workers**, 1,019,762 were disabled adult children, and 252,242 were disabled widows(ers).

Tables 8.5b–8.5g: In December 2014, of the 10,031,039 individuals who were beneficiaries under the **Social Security Disability Insurance** program, 372,634 were receiving benefits on the basis of injuries.

Table 8.6: In December 2014, of the \$11,187,403 spent on individuals who were beneficiaries under the **Social Security Disability Insurance** program, 10,232,223 was spent on individuals who were **disabled workers**, 182,957 was spent on individuals who were disabled adult children, and 772,219 was spent on individuals who were disabled widows(ers).

Table 8.7: In December 2014, of the 10,031,039 individuals ages 18 to 64 receiving **Supplemental Security Income** and/or **Social Security Disability Insurance**, 8,759,035 were **Social Security Disability Insurance** disabled workers only, 4,912,538 were **Supplemental Security Income** recipients only, and 1,372,931 were both **Social Security Disability Insurance** disabled workers and **Supplemental Security Income** recipients (i.e., concurrent beneficiaries).

Table 8.8a: From 2013 to 2014, the total number of recipients of **Supplemental Security Income** decreased by 0.3 percent. The total number of recipients increased the most in Nevada (by 4.6 percent) and decreased the most in New York (by 6.5 percent). From 2013 to 2014, the number of aged (65 or older) recipients of **Supplemental Security Income** decreased by 0.4 percent. The number of aged recipients increased the most in Nevada (by 5.0 percent) and decreased the most in New York (by 8.5 percent).

Table 8.8b: From 2013 to 2014, the number of blind recipients of **Supplemental Security Income** decreased by 0.4 percent. The number of blind recipients increased the most in Arizona (by 4.4 percent) and decreased the most in Vermont (by 5.9 percent). From 2013 to 2014, the number of disabled recipients of **Supplemental Security Income** decreased by 0.3 percent. The number of disabled recipients increased the most in Nevada (by 4.6 percent) and decreased the most in New York (by 6.1 percent).

Table 8.9a: From 2013 to 2014, the total number of recipients of **Social Security Disability Insurance** increased 0.4 percent. The total number of beneficiaries increased the most in Nevada (by 2.3 percent) and decreased the most in Montana (by 1.3 percent). From 2013 to 2014, the number of **disabled workers** receiving **Social Security Disability Insurance** increased by 0.2 percent.

Table 8.9b: From 2013 to 2014, the total number of beneficiaries of **Social Security Disability Insurance** among disabled adult children increased by 1.9 percent. The total number of beneficiaries among disabled adult children increased the most in Nevada (by 6.3 percent) and increased the least in Montana (by 0.2 percent). From 2013 to 2014, the number of disabled widow(er)s receiving **Social Security Disability Insurance** increased by 0.4 percent.

Table 8.10: The monthly number of **Social Security Disability Insurance** beneficiaries (**disabled-worker** benefits only) grew from

154,330 in January of 2003 to 233,526 in September of 2015. The highest number can be found in October of 2010, reporting 293,682 beneficiaries. The lowest number can be found in February 2003, reporting 136,075.

Source: Social Security Administration. Selected Data from Social Security's Disability Program. Release Date: ; www.ssa.gov/OACT/STATS/dibStat.html; (accessed 19 October 2015) The number of applications is for disabled-worker benefits only and, as such, excludes disabled child's and disabled widow(er)'s benefits. These applications ultimately result in either a denial or award of benefits.

Section 9: Special Education

This section presents statistics on **Special Education** programs in the United States, specifically on children served under the **Individuals with Disabilities Education Act, Part B**. These data concern the number of children with disabilities served (by age and by type of disability), mainstream education of children with disabilities, dropout and graduation rates, and state grant awards. The principal source of this data is the **Office of Special Education Programs' Data Accountability Center**, which produces the **Individuals with Disabilities Education Act 618 Data Tables**. Categories of disability and program outcomes under the **Individuals with Disabilities Education Act** can be found on the Center for Parent Information and Resources website.

Tables

Table 9.1: In the fall of 2013, there were 67,529,839 students ages 6 to 21. Of these students ages 6 to 21, 5,693,441 or 8.4 percent received **special education** services under **Individuals with Disabilities Education Act, Part B**. Hawaii had the smallest percentage (6.3 percent), while New Jersey had the largest percentage (11.6 percent).

Table 9.2: Of the 6,364,555 youth ages 3 to 21 who received **special education** services under **Individuals with Disabilities Education Act, Part B**, in the fall of 2013, 729,703 (or 11.5 percent) were 3 to 5 years old; 2,568,920 (or 40.4 percent) were 6 to 11 years old; 2,713,584 (or 42.6 percent) were 12 to 17 years old; and 352,348 (or 5.5 percent) were 18 to 21 years old.

Tables 9.3a-9.3d: The 5,669,057 students ages 6 to 21 who received **special education** services under **Individuals with Disabilities Education Act, Part B**, in the fall of 2013 were in the following diagnostic categories: 2,188,413 (or 38.6 percent) in specific learning disability, 1,080,790 (or 19.1 percent) in speech or language impairment, 411,048 (or 7.3 percent) in intellectual disabilities 350,870 (or 6.2 percent) in emotional disturbance, 140,209

(or 2.5 percent) in multiple disabilities, 65,502 (or 1.2 percent) in hearing impairments, 49,909 (or 0.9 percent) in orthopedic impairments, 958,751 (or 16.9 percent) in other health impairments, 24,988 (or 0.4 percent) in visual impairments, 476,058 (or 8.4 percent) in autism, 1,269 (or 0.02 percent) in deaf-blindness, 25,266 (or 0.4 percent) in traumatic brain injury, and 133,698 (or 2.4 percent) in developmental delay.

Table 9.4: Of the 5,734,393 youth ages 6 to 21 who received **special education** services under **Individuals with Disabilities Education Act, Part B**, in the fall of 2013, 4,655,902 (or 81.2 percent) spent 40 percent or more of their time in the regular classroom. New York had the smallest percentage (69.9 percent), while North Dakota had the largest percentage (91.9 percent).

Table 9.5: Of the 376,452 students ages 14 to 21 who exited **Individuals with Disabilities Education Act, Part B, special education** services in 2011-2012, 247,596 graduated with a diploma, 53,564 received a certificate, 77,797 dropped out, and 7,058 died/aged out of service.

Table 9.6: Of the 376,452 students ages 14 to 21 who exited **Individuals with Disabilities Education Act, Part B, special education** services in 2011-2012 by either graduating with a diploma, receiving a certificate of completion, dropping out, dying, or aging out of service, 64.6 percent graduated with a diploma. Mississippi had the smallest percentage (27.8 percent), while Minnesota had the largest percentage (88.3 percent).

Table 9.7: Of the 378,285 students ages 14 to 21 who exited **Individuals with Disabilities Education Act, Part B, special education** services in 2011-2012 by either graduating with a diploma, receiving a certificate of completion, dropping out, dying, or aging out of service, 19.7 percent dropped out. Tennessee had the smallest percentage (7.3 percent), while South Carolina had the largest percentage (46.2 percent).

Table 9.8: From the school year beginning in fall 2011 to the school year beginning in fall 2012, the graduation rate among students ages 14 to 21 served under **Individuals with Disabilities Education Act, Part B**, decreased by 0.5 **percentage points**. The graduation rate increased the most in Arizona (by 9.0 **percentage points**) and decreased the most in New Mexico (by 6.3 **percentage points**).

Table 9.9: From the school year beginning in fall 2010 to the school year beginning in fall 2011, the dropout rate among students ages 14 to 21 served under **Individuals with Disabilities Education Act, Part B**, increased by 0.4 **percentage points**. The dropout rate increased the most in Arizona (by 8.9 **percentage points**) and decreased the most in New Mexico (by 8.4 **percentage points**).

Section 10: Vocational Rehabilitation

This section presents statistics on **Vocational Rehabilitation programs, administered by the Rehabilitation Services Administration** in the United States. These data concern the number of individuals with disabilities who apply for services, receive services, and find employment (are **successfully rehabilitated**). Presented here categorically, **vocational rehabilitation** agencies often provide services through both state and private rehabilitation agencies (combined), broad state-based services for people (general), and specialized services to people with visual impairments (blind). The tables also address the expenditures associated with **vocational rehabilitation**, as well as whether **vocational rehabilitation** agencies are on **order of selection**. The principal source of this data is the **Rehabilitation Services Administration's** Management Information System. Please note: The statistics presented in this section may vary from those provided by state agencies due to varying methods and analytic procedures.

Tables

Table 10.1: In the **Federal Fiscal Year 2013** state **vocational rehabilitation** agencies processed 520,377 applicants.

Table 10.2: In the **Federal Fiscal Year 2013**, state **vocational rehabilitation** agencies closed 325,778 cases of individuals who either initiated or completed services.

Table 10.3: In the **Federal Fiscal Year 2013**, state **vocational rehabilitation** agencies closed 175,897 cases of individuals who either initiated or completed services in which the individuals entered **successful employment**.

Table 10.4: In the **Federal Fiscal Year 2013**, of 325,778 closed cases of individuals who either initiated or completed services, 64.9 percent achieved **successful employment**, i.e., a **rehabilitation rate** of 64.9 percent. The agency with the largest **rehabilitation rate** was the Vermont blind agency with 83.3 percent, while the agency with the smallest **rehabilitation rate** was the New Mexico blind agency with 22.1 percent.

Table 10.5: In the **Federal Fiscal Year 2013**, the U.S. spent a total of \$3,744,623,947 on **Vocational Rehabilitation** expenditures for people with disabilities. The California combined agency spent the most (\$355,543,864), while the Delaware blind agency spent the least (\$1,629,551).

Table 10.6: In the **Federal Fiscal Year 2013**, the U.S. spent a total of \$255,689,859 on **Vocational Rehabilitation** expenditures for **postsecondary institutions** of higher education for people with disabilities. The California combined agency spent the most on **postsecondary institutions** of higher education (\$23,986,123), while the Vermont blind agency spent the least on **postsecondary institutions** of higher education (\$68,541).

Table 10.7: In **Federal Fiscal Year 2013**, twenty-five agencies were on **Order of Selection**. Over the period from 2009 to 2013, seventeen states have never had any agency on **Order of Selection**: Alabama, Alaska, Arkansas, District of Columbia, Idaho, Indiana, Kansas, Mississippi, Montana, Nevada, New Hampshire, New Jersey, New York, North Carolina, South Carolina, South Dakota, Texas, and Utah. Over the period from 2009 to 2013, seventeen states have always had all of their agencies on **Order of Selection**: Arizona, California, Connecticut, Delaware, Florida, Illinois, Iowa, Kentucky, Louisiana, Maryland, Ohio, Oregon, Pennsylvania, Rhode Island, Tennessee, Vermont, and Wisconsin.

Table 10.8: From 2012 to 2013, the number of **Vocational Rehabilitation** applicants in the U.S. decreased by 6.8 percent. **Vocational Rehabilitation** applicants increased the most at the New Jersey blind agency (by 55.2 percent) and decreased the most at the North Dakota combined agency (by 36.9 percent).

Table 10.9: From 2012 to 2013, the **rehabilitation rate** increased in the U.S. by 3.1 **percentage points**. The **rehabilitation rate** increased the most at the Rhode Island blind agency (by 30.2 percentage points) and decreased by the most at the Rhode Island New Mexico (by 30.9 percentage points).

The rehabilitation rate is the number of closures with successful employment outcomes divided by the number of closures after initiating or completing services. [1] The difference in percentage points in the rehabilitation rate between 2012 and 2013.

Section 11: Federal Government Spending and Employment

This section presents statistics concerning Federal Government spending and **employment** in the United States. Specifically, these data address federal spending on **income** maintenance; housing and food assistance; health care; education, training, and **employment** readiness; and other programs, all for people with disabilities. This section also focuses on the number of people with disabilities and **people with targeted disabilities** employed by the Executive Branch, including specific data on the **employment** of people with disabilities and people with targeted disabilities within the departments of the Executive Branch. The principal sources of this data are “Federal Expenditures on Working-age People with Disabilities” for Fiscal Year 2008, a document produced by the Center for Studying Disability Policy, a part of Mathematica Policy Research Inc., as well as the 2007 edition of the U.S. Office of Personnel Management’s Federal **Civilian** Workforce Statistics Factbook. Definitions specific to this section (**disability status**, **employment**, and specific programs) can be found in this report online.

Tables

Table 11.1: In the **Federal Fiscal Year** 2008, the **Social Security Administration** spent \$136,917,000 on programs for working-age individuals with disabilities. That same year, \$20,116,000 was spent on **Veterans’** Programs.

Table 11.2: In the **Federal Fiscal Year** 2008, the Federal Government spent \$7,821,000 on food assistance programs for working-age individuals with disabilities.

Table 11.3: In the **Federal Fiscal Year** 2008, the Federal Government spent \$13,797,000 on **Veterans’** Programs. In the **Federal Fiscal Year** 2007, the Federal Government spent \$1,051,000 on Workers Compensation medical costs.

Table 11.4: This table lists amounts spent on **Vocational Rehabilitation**, Education, and other **employment** related programs for

individuals with disabilities for the most recent years available.

Table 11.5: In the **Federal Fiscal Year** 2008, the Federal Government spent \$215,000,000 on transportation services and \$176,000,000 on demonstrations/systems change for people with disabilities. In the **Federal Fiscal Year** 2007, the Federal Government spent \$367,000,000 on a Social Services Block Grant for people with disabilities.

Table 11.6: As of September 30, 2006, the Executive Branch of the Federal Government employed a total of 123,484 people with disabilities (6.8 percent of total employees) and 17,711 people with targeted disabilities (1.0 percent of total employees). The Department of **Veterans** Affairs had the largest percentage of their employees with disabilities (9.4 percent), while the Department of Justice had the smallest percent of their employees with disabilities (3.5 percent). The Department of the Treasury had the largest percentage of their employees with targeted disabilities (1.8 percent), while the Department of Homeland Security and the Department of Justice had the smallest percentage of employees with targeted disabilities (0.4 percent).

Table 11.1 Federal Government Spending and Employment—Federal Expenditures on Income Maintenance Programs

Program	Amount \$ [1]	Year
Social Security Administration		
SSDI-Disabled Worker	136,917	2008
SSDI payments to spouse and children of disabled worker	94,746	2008

- [3] The number of people employed with targeted disabilities as a percent of the total number of people employed.

Section 12: International Patterns

This section presents international disability statistics. Specifically, these data address international **employment** rates for people with disabilities and the percentages of total **populations** receiving disability benefits. Both of the tables in this section face severe limitations. In both of the tables, it is difficult to compare rates across countries because countries often define disabilities differently and have different **employment** and benefits structures. Additionally, the data may come from different types of sources (for example: from a survey versus from a census) and represent different years. The principal source of this data is a report by the **Organization of Economic Cooperation and Development**. The definitions of **employment** and disability are not included for this section due to the number and variation of definitions across countries, please refer to original reports.

Tables

Table 12.1: In 2004, the **employment** rate of individuals of working-age with disabilities was 39.9 percent. This table lists **employment** rates for people with disabilities in 25 countries for the most recent year collected by the **Organization for Economic Cooperation and Development**. These data are limited by differences in the sources, the years represented, and the definitions of disability.

Table 12.2: In 2006, 5.9 percent of the United States working-age **population** received disability benefits. This table lists the percentage of **populations** in 26 countries receiving disability benefits for the most recent year collected by the **Organization for Economic Cooperation and Development**. These data are limited by differences in the sources, the years represented, and the definitions of disability.

Source: Organization for Economic Cooperation and Development (OECD), "Sickness, Disability and Work: Key figures and data on low employment rates of people with disability and high disability benefit reciprocity rates in many OECD countries", Data Figure One, www.oecd.org/els/soc/42654215.xls (accessed 30 July 2014). This data is limited by differences in sources, years the data was collected, and definitions of disability.

Section 13: Disability Type

This section presents statistics that allow for the most detail available in United States disability statistics with respect to **disability type** and severity. **Population** size, prevalence, **employment**, **earnings**, and family **income** statistics are provided. These estimates are based on the **U.S. Census Bureau’s Survey of Income and Program Participation**. These estimates are from Brault (2012), Americans with Disabilities: 2010 (U.S. Census Bureau Current **Population** Reports, P70-131), which also contains comparisons to 2005 estimates. Definitions specific to this section (**disability status**, **employment**, **earnings** and **family income**) can be found in the original report.

Tables

Table 13.1: Based on data from the **Survey of Income and Program Participation**, in 2010 (May–August 2010), there were 303,858,000 **civilians living in the community**, 56,672,000 of which were individuals with disabilities—a prevalence rate of 18.7 percent. Among individuals with disabilities, 38,284,000 had severe disabilities.

Table 13.2: In 2010 (May–August 2010), among the 177,295,000 individuals ages 21 to 64 **living in the community**, 16.6 percent (29,479,000 individuals) were people with disabilities, 2.3 percent (4,112,000 individuals) had difficulty seeing, 1.9 percent (3,310,000 individuals) had difficulty hearing, 6.6 percent (11,759,000 individuals) had difficulty walking, and 6.0 percent (10,661,000 individuals) had mental disabilities. Among individuals reporting an activity limitation and/or fair/poor health, 8,099,000 individuals reported back or spine problems as the cause.

Table 13.3: In 2010 (May–August 2010), among the 38,599,000 individuals ages 65 and older **living in the community**, 49.8 percent (19,234,000 individuals) were people with disabilities, 9.8 percent (3,782,000 individuals) had difficulty seeing, 10.8 percent (4,152,000 individuals) had difficulty hearing, 30.8 percent (11,883,000 individuals) had difficulty walking,

and 7.8 percent (3,024,000 individuals) had mental disabilities.

Table 13.4: In 2010 (May–August 2010), among the 29,479,000 individuals with disabilities (age 21 to 64 **living in the community**), 41.1 percent were employed, compared to 79.1 percent of their counterparts without disabilities. The **employment** rate varies by **disability type**: 41.7 percent for those with difficulty seeing, 55.5 percent for those with difficulty hearing, 28.7 percent for those with difficulty walking, and 34.1 percent for those with mental disabilities.

Table 13.5: In 2010 (May–August 2010), among the 38,599,000 individuals with disabilities (age 65 years and over **living in the community**), median monthly **earnings** were \$1,961,000 compared to \$2,724,000 for their counterparts without disabilities. Among individuals with disabilities (age 65 years and over **living in the community**), median monthly family **income** were \$2,856,000 compared to \$4,771,000 for their counterparts without disabilities.

Glossary

Ambulatory Disability (ACS)—In the American Community Survey, individuals five or more years old who responded “yes” when asked if they had “serious difficulty walking or climbing stairs.”

American Community Survey (ACS)—The American Community Survey is a large, continuous demographic survey conducted by the U.S. Census Bureau that will provide accurate and up-to-date profiles of America’s communities every year. Annual and multi-year estimates of population and housing data are generated for small areas, including tracts and population subgroups. This information is collected by mailing questionnaires to a sample of addresses. See the U.S. Census Bureau website for additional details.

Base Population—The sum of a population or an estimate used as the root for evaluation purposes. Typically, the last Census count or the estimate from a previous date is used.

Behavioral Risk Factor Surveillance Survey (BRFSS)—The Behavioral Risk Factor Surveillance System (BRFSS) is a state-based system of health surveys that collects information on health risk behaviors, preventive health practices, and health care access primarily related to chronic disease and injury. BRFSS was established in 1984 by the Centers for Disease Control and Prevention (CDC); currently data are collected monthly in all 50 states, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, and Guam. More than 350,000 adults are interviewed each year, making the BRFSS the largest telephone health survey in the world. States use BRFSS data to identify emerging health problems, establish and track health objectives, and develop and evaluate public health policies and programs. Many states also use BRFSS data to support health-related legislative efforts. See the Centers for Disease Control and Prevention website for additional details.

Binge Drinking (BRFSS)—Respondents were asked “[c]onsidering all types of alcoholic beverages, how many times during the past 30

days did you have [5, if male respondent] [4, if female respondents] or more drinks on an occasion?” Respondents who reported doing so at least one time were considered to have engaged in binge drinking.

Beneficiary (SSA) —An individual who is receiving benefits, or monthly payments, from Social Security Disability Insurance.

Centers for Medicaid and Medicare Services (CMS)—The federal agency with the United States Department of Health and Human Services that administers the Medicaid and Medicare programs.

Civilian—A person not in active-duty military.

Cognitive Difficulty (ACS)—In the American Community Survey, individuals who indicated “yes” when asked if due to a physical, mental, or emotional problem, having difficulty remembering, concentrating, or making decisions (DREM).

Current Population Survey-Basic Monthly (CPS-BMS)—The Current Population Survey-Basic Monthly Survey (CPS-BMS) is a monthly survey of about 50,000 households conducted by the Bureau of the Census for the Bureau of Labor Statistics. This survey is the primary source of information on the labor force characteristics of the U.S. population and provides estimates for the nation as a whole. The sample is scientifically selected to represent the civilian non-institutionalized population. Individuals are asked questions about the employment status of each member of the household 15 years of age and older, but published data only focuses on those ages 16 and over. Estimates obtained from the CPS-BMS include employment, unemployment, earnings, hours of work, and other indicators. See the U.S. Census Bureau website for additional details.

Current Population Survey-Annual Social and Economic Supplement (CPS-ASEC)—The Current Population Survey Annual Social and Economic Supplement (CPS-ASEC) is an annual survey conducted by the Bureau of the Census. This survey is the primary

source of information on income, poverty, and health insurance in the U.S. It also asks about employment in the previous calendar year. The sample for the CPS-ASEC is drawn from the sample of the CPS-BMS. The CPS-ASEC is also known as the CPS March Supplement and the CPS Income Supplement. See the U.S. Census Bureau website for additional details.

Disability Rating—The disability rating scale is used to track the impairment, disability, or handicap of an individual. The severity of the disability corresponds to the value of the rating and used to determine eligibility for supports and services and ability to work or return to work.

Disability Status (ACS)—The U.S. Census Bureau used six questions to identify persons with disabilities. A response of “yes” to any one of the questions indicates that the person in question has a disability—vision, hearing, cognitive, ambulatory, self-care, and independent living. However, the cognitive, ambulatory, self-care, and independent living related questions are not used to identify disability in individuals less than five years old, and the independent living related question is not used to identify disability in individuals less than 18 years old.

Disability Status (BRFSS)—An individual is classified as having a disability based on answers to the following questions: (1) Are you limited in any way in any activities because of physical, mental, or emotional problems? and (2) Do you now have any health problem that requires you to use special equipment, such as a cane, a wheelchair, a special bed, or a special telephone? (Include occasional use or use in certain circumstances.)

Disability Status (ACS, CPS-BMS & CPS-ASEC)—The American Community Survey and CPS uses a set of six questions to identify persons with disabilities. A response of “yes” to any one of the questions indicates that the person in question has a disability. The disability questions appear in the CPS in the following format:

This month we want to learn about people who have physical, mental, or emotional conditions that cause serious difficulty with their daily activities. Please answer for household members who are 16 years old or over.

- *Is anyone deaf or does anyone have serious difficulty hearing?*
- *Is anyone blind or does anyone have serious difficulty seeing even when wearing glasses?*
- *Because of a physical, mental, or emotional condition, does anyone have serious difficulty concentrating, remembering, or making decisions?*
- *Does anyone have serious difficulty walking or climbing stairs?*
- *Does anyone have difficulty dressing or bathing?*
- *Because of a physical, mental, or emotional condition, does anyone have difficulty doing errands alone such as visiting a doctor’s office or shopping?*

Disability Type—See **disability status** and specific definitions in the glossary (Vision Disability, Hearing Disability, Ambulatory Disability, Cognitive Disability, Independent Living Disability, and Self-Care Disability).

Disabled-Worker (SSA)—A worker not yet at full retirement age receiving insurance payments due to a disability.

Earned/Earnings (ACS)—Regularly received income from salaries/wages, self-employment or both, for people 16 or more years old before deductions for personal income taxes, Social Security, bond purchases, union dues, Medicare deductions, etc.

Earnings Gap—The difference in percentage earned between two populations, usually people with and without disabilities.

Educational Attainment (ACS)—All individuals 18 years or older are classified based on their highest degree or level of education attained. The categories include:

1. Completed the twelfth grade without receiving a high school diploma.
2. High school graduate meaning received a diploma or General Educational Development (G.E.D.), and did not attend college.
3. Some college credit, but less than one year.
4. One or more years of college, but no degree.
5. Associate's degree which includes people who generally completed two years of college level work in an occupational program that prepared them for a specific occupation, or an academic program primarily in the arts and sciences. The course work may or may not be transferable to a bachelor's degree.
6. Bachelor's degree or more which includes individuals who received a bachelor's degree and have taken additional courses but not received a Master's or PhD.
7. Master's degrees include the traditional MA and MS degrees and field-specific degrees, such as MSW and MBA.
8. Professional degrees which includes MD, DDS, DVM, LLB, and JD.
9. Doctorate degrees which include PhD.

Schooling completed in foreign or ungraded school systems is reported as the equivalent level of schooling in the regular American system. Certificates or diplomas for training in specific trades or from vocational, technical, or business schools are not included. Honorary degrees awarded for a respondent's accomplishments are not included.

Employed/Employed Persons (CPS-BMS & CPS- ASEC)—Individuals 16 years or older who are civilians and are not currently institutionalized and, during the reference week; (a) performed at least one hour of work as a paid employee, worked in their own business, profession, or on their own farm, or worked 15 hours or more as unpaid worker in a business owned by a relative; and (b) all those who had jobs or businesses but are on

leave because of vacation, illness, bad weather, childcare problems, maternity or paternity leave, labor-management dispute, job training, or other family or personal reasons, regardless of whether they were compensated for the time off or were seeking other jobs. Each employed person is counted only once, even if he or she holds more than one job. Individuals who work around their own house (painting, repairing, or own home housework) or volunteer for religious, charitable, and other organizations are excluded.

Employed/Employed Persons (ACS)—In the American Community Survey, people who responded as having worked during the past week. See **employed** status for the American Community Survey for greater detail.

Employment/Employment Status (ACS)—In the American Community Survey, individuals were asked a series of questions designed to identify their status. Based on the answers, individuals were classified into one of five groups: (1) people who worked at any time during the reference week; (2) people on temporary layoff who were available for work; (3) people who did not work during the reference week but who had jobs or businesses from which they were temporarily absent (excluding layoff); (4) people who did not work during the reference week, but who were looking for work during the last four weeks and were available for work during the reference week; and (5) people not in the labor force. The employment status data shown in American Community Survey tabulations relate to people 16 years or older.

Employment Gap—The difference between the percentage of people employed for two different sub-populations, usually people with and without disabilities.

Employment Participation—Individuals who participated in the labor force. Includes all persons classified as employed or unemployed.

Employment-Population Ratio (CPS-BMS)—The proportion of the civilian non-institutional

population aged 16 or more years who are employed.

Employment Rate (CPS-ASEC)—The number of individuals that are employed as a percent of the civilian non-institutional population.

Federal Fiscal Year—The United States federal government's fiscal year is the twelve month period ending on September 30th of that year.

Full-Time, Full-Year (CPS-ASEC)—A person is considered to be a working full-time, full-year if he or she worked 35 hours or more per week for 50 to 52 weeks in the past 12 months.

Full-Time, Full-Year Rate (CPS-ASEC)—The number of individuals that are working full-time, full-year as a percent of the civilian non-institutional population.

Hearing Disability (ACS)—In the American Community Survey, individuals who indicated “yes” when asked if they were “deaf or ... [had] serious difficulty hearing.”

Health Insurance Coverage (ACS)—In the American Community Survey, health insurance coverage is broadly defined as both private health insurance and public coverage. Respondents are asked to report their current coverage and to mark “yes” or “no” for each of the eight types listed:

1. Insurance through a current or former employer or union (of this person or another family member).
2. Insurance purchased directly from an insurance company (by this person or another family member).
3. Medicare, for people 65 and older, or people with certain disabilities.
4. Medicaid, Medical Assistance, or any kind of government-assistance plan for those with low incomes or a disability.
5. TRICARE or other military health care.
6. VA (including those who have ever used or enrolled for VA health care).
7. Indian Health Service.

8. Any other type of health insurance or health coverage plan.

Health Insurance Coverage (BRFSS)—In the Behavioral Risk Factor Surveillance System, respondents are considered to have health insurance coverage if they respond ‘yes’ to having, “...any kind of health care coverage, including health insurance, prepaid plans such as HMOs, or government plans such as Medicare, or Indian Health Service?”

Health Insurance Coverage Gap—The difference in percent health insurance coverage between people with and without disabilities.

Income (ACS)—The sum of all wages, salary, commissions, bonuses, and tips; self-employment income from own nonfarm and farm businesses, including proprietorships and partnerships; interest, dividends, net rental income, royalty income, and income from estates and trusts; Social Security and Railroad Retirement income; Supplemental Security Income; any public assistance and welfare payments from the state and local welfare office; retirement, survivor, and disability pensions; and any other sources received regularly such as Veterans Affairs payments, unemployment compensation, child support, and alimony.

Income Maintenance Programs—Government programs that provide direct financial assistance to needy individuals, families, and/or households. Examples include Temporary Assistance to Needy Families (TANF) and general assistance.

Independent Living Disability (ACS)—In the American Community Survey, individuals who indicated “yes” when asked if due to a physical, mental, or emotional condition, they had difficulty “doing errands alone such as visiting a doctor’s office or shopping.”

Individuals with Disabilities Education Act (IDEA)—A law ensuring services to children with disabilities throughout the nation. IDEA governs how states and public agencies provide early intervention, special education, and related services to more than 6.5 million eligible infants, toddlers, children, and youth

with disabilities. Infants and toddlers with disabilities (birth-2) and their families receive early intervention services under IDEA Part C. Children and youth (ages 3-21) receive special education and related services under IDEA Part B.

Labor Force (CPS-BMS & CPS-ASEC)—All persons classified as employed or unemployed.

Labor Force Participation Rate (CPS-BMS & CPS-ASEC)—The labor force as a percent of the civilian non-institutional population.

Labor Market Attachment (CPS-ASEC)—A person is considered to be attached to the labor market if he or she worked at least 52 hours in the calendar year prior to the survey.

Labor Market Attachment Rate (CPS-ASEC)—The number of individuals attached to the labor market as a percent of the civilian non-institutional population.

Living in the Community—Describes persons who are residing in the community and who are not living in institutions such as jails, prisons, nursing homes, hospitals, etc.

Median Earnings—The median is the middlemost value of a sample that separates the upper half of the values from the lower half of the values. The median earnings is the amount that divides the income distribution in two equal groups. Half of the people earn more than this value and half of the people earn less than this value.

Medicaid (CMS)—Medicaid is a state administered, but federally required, program to provide health insurance to certain groups of people. States determine specific eligibility requirements, but in general low income individuals, families, children, and pregnant women are eligible for health care coverage under Medicaid. In some states, other groups (such as people with disabilities) are also eligible.

Medicare (CMS)—Medicare is a Federal program that provides health care services to individuals 65 or older, individuals under age 65 with disabilities, and individuals of all ages

with end-stage renal failure. There are three programs within Medicare: Part A (hospital insurance), Part B (medical insurance), and Prescription Drug Coverage (new since January 1, 2006). Individuals pay into Part A throughout their careers, and then Part A covers that individual for hospital care. People who are eligible for Medicare have the opportunity to purchase Part B, or medical insurance that covers them for more than just hospital care.

Non-Institutionalized Population—Describes individuals who are residing in the community and who are not living in institutions such as jails, prisons, nursing homes, hospitals, etc.

OASDI Benefits—The Social Security Administration's Old-Age, Survivors, and Disability Insurance (OASDI) program provides monthly benefits to qualified retired and disabled workers, their dependents and to survivors of insured workers. Eligibility and benefit amounts are determined by the worker's contributions to Social Security.

Obese/Obesity (BRFSS)—The condition where a person has a body mass index greater than 30.

Office of Special Education Programs—Part of the United States Department of Education, the Office of Special Education Programs' mission is to improve education-related outcomes and experiences of infants, toddlers, children and youth with disabilities ages birth through 21 by providing leadership and financial support at the state and federal level. Their goals include:

- “Fostering and supporting research and the development of knowledge and innovations to improve results for infants, toddlers, children, and youth with disabilities;” and
- “Evaluating, monitoring and reporting on the implementation of federal policy and programs and the effectiveness of early intervention and educational efforts for infants, toddlers, children, and youth with disabilities.”

Order of Selection—A state is required by the Federal Government to implement an order of selection when it does not have the funds and/or the personnel to provide services for all eligible individuals with disabilities. This process is detailed under The Rehabilitation Act of 1973 and 34 CFR 361.36. When this situation occurs, a state must classify eligible individuals according to the significance of their disability(ies), and must serve the most significantly disabled first.

Organization for Economic Cooperation and Development (OECD)—The OECD brings together the governments of countries committed to democracy and the market economy from around the world to support sustainable economic growth, boost employment, raise living standards, maintain financial stability, assist other countries' economic development, and contribute to growth in world trade. The OECD provides a setting where governments compare policy experiences, seek answers to common problems, identify good practice, and coordinate domestic and international policies.

Participation in the labor force—See **labor force**.

Percentage Point(s)—A number, count or ratio expressed as a fraction of 100.

Persons with Targeted Disability—People with Targeted Disabilities are recognized and defined by the Equal Employment Opportunity Commission and United States Office of Personnel Management as “[People with]... the most severe disabilities including blindness, deafness, partial and full paralysis, missing extremities, dwarfism, epilepsy, intellectual disabilities, and psychiatric disabilities. Individuals with these disabilities typically have the greatest difficulty finding employment. ... the federal government has a special emphasis on recruiting, hiring, and retaining people with targeted disabilities.”

Prevalence—The proportion of the population with a particular status or condition. Prevalence is usually expressed as a percentage

or a number of people per unit of the population.

Prevalence Rate—The prevalence of a particular status or condition estimated over a specific period of time.

Projected Population—Estimates of what the population will be at a future date. The United States Census Bureau definition states that population projections “are typically based on an estimated population consistent with the most recent decennial census and are produced using the cohort-component method.”

Population—The total number of inhabitants in a defined geographic area including all races, classes, and groups.

Poverty (ACS & CPS-ASEC)—The U.S. Office of Management and Budget in Statistical Policy Directive 14 sets the standards for which poverty is calculated. The U.S. Census Bureau uses a set of dollar value thresholds that vary by family size and composition to determine who is in poverty. If a family's total income is less than the dollar value of the appropriate threshold, then that family and every individual in it are considered to be in poverty.

Poverty Gap—The difference between the poverty rates of two populations, usually people with and without disabilities.

Poverty Rate (ACS & CPS-ASEC)—Percent of the population who are determined to be in poverty.

Postsecondary Institutions—In the United States, any education, school, training or program beyond the high school level.

Race (ACS)—Individuals identified themselves as one of six categories in the survey: White, Black or African American, American Indian or Alaska Native, Asian, Native Hawaiian or Other Pacific Islander, and Some Other Race.

Rehabilitation Rate—The number of successful employment outcomes divided by the number of closures after initiating or completing services.

Rehabilitation Services Administration—The Rehabilitation Services Administration is a United States Department of Education agency that help individuals with disabilities obtain employment and live more independently. Data provided by the Rehabilitation Services Administration can be found in the ‘Ad Hoc Query’ section of their website: <http://rsa.ed.gov>.

Resident Population—All residents (both civilian and Armed Forces) living in the United States (all 50 states and the District of Columbia).

Sampling Variability—The variation of a statistic when estimated from repeated samples.

Seasonally Adjusted Statistics—Statistics that face predictable variation over the course of a year due to seasonal changes (i.e. increases in employment in farming during harvest months) and are adjusted using statistical techniques that attempt to account for these expected seasonal changes.

Self-Care Disability (ACS)—In the American Community Survey, individuals who indicated “yes” when asked if they “have difficulty dressing or bathing.”

Service-Connected Disability Rating—In the American Community Survey, the VA service-connected disability rating for an individual who is a veteran. The rating reflects the degree of the veteran’s disability on a scale from 0 to 100 percent, in increments of 10 percent.

Service-Connected Disability Rating Status—In the American Community Survey, the designation associated with individuals who were in the Reserves or National Guard, trained with the Reserves or National Guard, or active-duty military that have a disability as a result of disease or injury incurred or aggravated during active military service. These disabilities are defined according to the VA Schedule for Rating Disabilities in Title 38, U.S. Code of Federal Regulations, Part 4.

Smoking (BRFSS)—Respondents were asked about smoking: “Have you smoked at least 100 cigarettes in your entire life?” and “Do you now

smoke cigarettes every day, some days, or not at all?” Respondents who reported smoking at least 100 cigarettes in their lifetime and who, at the time of survey, smoked either every day or some days were defined as current smoker (i.e., smoking).

Social Security Administration—The Social Security Administration is an independent agency within the United States federal government managing services supporting people eligible for social security programs. This includes employment-, retirement-, survivor- and disability-related benefits. These benefits are earned by paying Social Security taxes on earnings.

Social Security Disability Insurance (SSDI)—A monthly benefit paid to disabled workers and certain family members if the worker meets eligibility criteria including evidence of disability and a sufficient work history.

Social Security Income (SSI)— A monthly benefit paid to low-income persons with disabilities if they meet eligibility criteria including evidence of disability.

Special Education—Specially designed instruction, at no cost to the parents, to meet the unique needs of a child with a disability, including (i) instruction at the classroom, home, hospitals and institutions, and in other settings; and (ii) physical education. The term can include each of the following: (i) speech-language pathology services, or any other related service, if the service is considered special education rather than a related service under state standards; (ii) travel training; and (iii) vocational education.

Successful Employment (VR)—The U.S. Department of Education Rehabilitation Services Administration defines successful employment as employment for at least 90 days in an integrated employment setting.

Successfully Rehabilitated—Successful rehabilitation describes achieved vocational rehabilitation outcomes including occupational/vocational skills training, employment (re-

entering the workforce), technical assistance, and transportation services.

Supplemental Security Income (SSI)—The Social Security Administration pays benefits to disabled adults and children who have limited income and resources. Social Security Income benefits also are payable to people 65 and older without disabilities who meet the financial limits.

Survey of Income and Program Participation (SIPP)—The Survey of Income and Program Participation is a large, continuous, cross-sectional and longitudinal survey that collects information on the income and program participation on the American people. This includes information on economics, family dynamics, education, assets, health insurance, and food security. See the U.S. Census Bureau website for additional details.

Unemployed Persons (CPS-BMS & CPS-ASEC)—Individuals who are 16 years or older and were available to work, who had no employment during the reference week, and had made specific efforts to find employment sometime during the month prior to the reference week.

Unemployment Rate (ACS, CPS-BMS, CPS-ASEC)—The percent of the labor force who do not have a job and are available and looking for work. See **unemployed persons**.

United States Census Bureau—An agency within the United States Federal Statistical System tasked with producing data about the American people and economy. Their primary task is to conduct the United States Census every ten years.

United States Department of Health and Human Services—A department in the United States government tasked with protecting and maintaining the health of all Americans.

Veteran(s)—A person who previously served in the armed forces.

Veteran Benefits—Federal assistance provided to Veterans and their dependents. This includes disability compensation, Veteran's pension

programs, medical care, and educational programs.

Vision Disability—In the American Community Survey, individuals who indicated “yes” when asked if they were “blind or ... have serious difficulty seeing even when wearing glasses.”

Vocational Rehabilitation (VR)—Employment services offered to individuals with mental or physical disabilities. These services are designed to enable participants to attain skills, resources, attitudes, and expectations needed to compete in the interview process, get a job, and keep a job. These services may also help an individual retrain for employment after an injury or mental disorder has disrupted previous employment.

Work Limitation (CPS-ASEC)—A person is considered to have a work limitation if he or she has “a health problem or disability which prevents them from working or which limits the kind or amount of work he or she can do.”

Rehabilitation Research and Training Center on Disability Statistics and Demographics

The Center facilitates evidence-based decision making in many different service and policy arenas to benefit persons with disabilities, leading to improved social outcomes. Large quantities of survey data and administrative records related to people with disabilities are collected each year. Yet these data lack continuity and are underutilized, leading to missed opportunities to improve the programs and policies that advance the lives of people with disabilities. Policymakers, program administrators, service providers, researchers, advocates for people with disabilities, and people with disabilities and their families need accessible, valid data/statistics to support their decisions related to policy improvements, program administration, service delivery, protection of civil rights, and major life activities.

The Center's goal is to support decision making through a variety of integrated research and outreach activities by (a) improving knowledge about and access to existing data, (b) generating the knowledge needed to improve future disability data collection, and (c) strengthening connections between the data from and regarding respondents, researchers, and decision makers. In this way, the Center hopes to support the improvement of service systems that advance the quality of life of people with disabilities.

Center Collaborators

The Center is a joint effort of

- University of New Hampshire – led by Andrew Houtenville, in collaboration with
- American Association of People with Disabilities – led by Lisa Ekman,
- Center for Essential Management Services – led by David Vandergoot,
- Council of State Administrators of Vocational Rehabilitation – led by Stephen Wooderson,

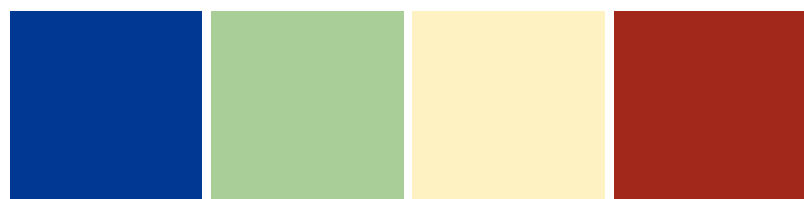

- Kessler Institute for Rehabilitation – led by John O'Neill,
- Mathematica Policy Research – led by David Wittenburg, and
- Public Health Institute - led by Lewis Kraus

The StatsRRTC is funded by the U.S. Department of Health and Human Services, Administration for Community Living, National Institute on Disability, Independent Living and Rehabilitation Research under grant number 90RT502201, from 2013 - 2018.
